September 2026

1. Introduction

GrembleCoin is a community-driven memecoin project on Solana built around the original Gremble character, a growing fictional world and a long-term brand vision. The project began with a simple goal: build an active community first and continue developing beyond the initial token launch.

GrembleCoin is intentionally positioned as a memecoin. It does not represent equity, ownership in a company, a debt instrument, or a promise of financial return. The project combines internet culture, community participation, creative content and future brand development.

2. Vision

The long-term goal is to develop GrembleCoin into a recognizable community brand rather than focus only on short-term token price. The project intends to expand the Gremble character and universe through community content, games, storytelling and, where practical, physical merchandise and other media.

Community participation is central to this direction. Holders and followers can contribute ideas, memes, feedback and creative concepts while the core project continues to develop the brand and its infrastructure.

3. The Gremble Character & World

Gremble is the original golden character at the center of GrembleCoin. He lives in a harsh post-war fictional world shaped by the poor decisions of previous leaders. Born into an upper-class family whose wealth came from weapons manufacturing and sales, Gremble rejects the belief that the world should remain unchanged.

Intelligent, ambitious and mischievous, he wants to build something independently. He invests heavily in new ideas and projects and gradually separates himself from his family's expectations. The story is designed to evolve over time with mystery, darker themes and contributions from the community.

4. Token Overview

GrembleCoin (\$GREMBLE) is issued on the Solana blockchain. The total supply is fixed at 1,000,000,000 \$GREMBLE tokens.

\$GREMBLE is the token symbol used for GrembleCoin. The token is designed primarily as the native community token around the GrembleCoin ecosystem, including community activities, campaigns, games, rewards and future integrations. Any future utility will be announced through official GrembleCoin channels and should not be assumed until released.

5. Token Information

Token name	GrembleCoin
Ticker	\$GREMBLE
Blockchain	Solana

Total supply	1,000,000,000 \$GREMBLE
Owner-held supply	5%
Locked supply	6%
Contract address	55wNKcF14DxhfC4Wkh6vLPfhZEsIZUJxG5XKRGMWpump
Project type	Community memecoin / character brand

6. Ownership, Locking & Transparency

At the time of this whitepaper, the owner holds 5% of the total GrembleCoin supply. A separate 6% of the total supply is locked.

These are separate allocations: the owner-held amount is 5%, while 6% is held in a locked allocation. Token distribution and wallet balances can change as transfers, rewards, liquidity operations and market activity occur. Users should independently verify current on-chain balances and lock status before making decisions.

GrembleCoin aims to communicate important contract, wallet, lock and project updates publicly through its official channels.

7. Community & Ecosystem

GrembleCoin's development strategy is community-first. Activities include community discussions, memes, competitions, giveaways, Q&A; sessions and browser-based games connected to the Gremble brand. The project also works to increase visibility through crypto data platforms, listings, partnerships and community-led promotion.

The project does not promise that community growth, listings, marketing or partnerships will result in an increase in token value.

8. Development Roadmap

Phase 1 focuses on the token launch, the official website and social channels, building the initial community, improving transparency and expanding GrembleCoin's presence across relevant crypto tracking and discovery platforms.

Phase 2 focuses on continued community growth, further development of the Gremble story and games, additional integrations, broader project visibility and appropriate exchange or platform applications.

Longer term, the project intends to explore merchandise, expanded entertainment content and other ways to develop GrembleCoin and its character into a recognizable brand. Roadmap items are goals rather than guarantees and may change based on resources, technical feasibility, market conditions and community feedback.

9. Team

GrembleCoin is developed by a small team combining project development, construction-industry business experience, community management and moderation. The project is currently in an early stage and the team structure may expand as operational needs grow.

The team prioritizes direct communication with the community and continued development of the project rather than presenting GrembleCoin as a finished product.

10. Security & Risk

Cryptocurrency and memecoins are highly speculative and volatile. Buyers can lose part or all of the value used to acquire \$GREMBLE. Risks include market volatility, liquidity changes, smart-contract and blockchain risks, wallet security, regulatory changes, third-party platform failures, scams and impersonation.

Users should verify the official GrembleCoin contract address and links before interacting with the token. GrembleCoin does not guarantee price appreciation, liquidity, exchange listings, rewards or future functionality. Nothing in this whitepaper constitutes financial, investment, legal or tax advice.

11. Official Information

The official project website is gremblecoin.com. Official social-media links and the verified \$GREMBLE contract address should be accessed from the project website whenever possible. Users should be cautious of fake tokens, accounts, websites and unsolicited direct messages impersonating GrembleCoin.

12. Disclaimer

This document is provided for informational purposes and describes the current vision of the GrembleCoin project as of September 2026. It is not an offer to sell securities, a solicitation of an investment, or a guarantee of any future result.

Plans, features, integrations, allocations and timelines may be revised. Readers are responsible for conducting their own research and complying with laws applicable in their jurisdiction before acquiring or using cryptoassets.
